SPARK Portal Builder Toolkit Release Notes v2.0.2

May 2016

SPARK Portal Builder Toolkit improves the End-user experience in IBM BPM through the use of highly flexible and customizable process portals. The SPARK Portal Builder Toolkit is faster, control rich, simple, powerful, modern, flexible, and responsive. It provides developers UI controls with:

- methods, events and properties,
- attachable logic,
- simplified addressability,
- full consistency between views and pages,
- high-performance for large tabular data sets
- heightened “build & use” experience throughout
- consistent 3X to 4X efficiency gains

SPARK Portal Builder Toolkit 2.0 features:

- suitable for both production and fast-build demo scenarios
- instance, task, and service lists
- list searching
- saved searches
- task and service ui frames

For more information on the controls available in the toolkit, visit the [Controls](#) page of [Salient Support](#).

Prerequisites

The SPARK Portal Builder Toolkit requires at least IBM Business Process Manager 8.5.0.1. Any version of IBM Business Process Manager (Express, Standard, or Advanced) will work with the SPARK Portal Builder Toolkit.

System Requirements

Since the SPARK Portal Builder Toolkit comes as a .twx file that is used for IBM Business Process Manager development, IBM Business Process Manager's Process Designer client is required for use.*

Browser Support:

- IE 10+
- Firefox (25+)
- Chrome (30+)
- Safari in iOS 6+

* IBM Business Process Manager 8.5.5+ includes a web based Process Designer. However, Salient recommends using the traditional, eclipse-based Process Designer due to some shortcomings of the web based Process Designer. Our toolkit is compatible with the web based Process Designer, however some development features are not fully functional with the web based version.

Installation and Update

Before you begin:

- [Obtain the SPARK Portal Builder Toolkit](#) from Salient Process for your version of IBM BPM
- You must have access to your environment's process center repository to be able to import the SPARK Portal Builder Toolkit.

Installation Procedure:

1. Copy the SPARK toolkit on a drive that is accessible from the IBM BPM server.
2. Log in to the IBM BPM Process Designer or Process Center
3. Click the **Toolkits tab**.
4. Click the **Import Toolkit** link on the right side of the Toolkits view and locate the file to import from step 1.
5. Click **Import**.
6. To verify the import of the toolkit, click on the **Process Apps tab** and then back to **Toolkits tab**. The toolkit should be listed.

Update Procedure:

Because every version of the SPARK Portal Builder Toolkit is just a new snapshot, simply import a new snapshot of the toolkit to complete your update. For more information on installing the toolkit, visit:

Enhancements

There have been no enhancements to the SPARK Portal Builder Toolkit at this time. For more information on SPARK Portal Builder Toolkit visit: <http://support.salientprocess.com>.

Fixes

2.0.2

- Calling the filter method from an On Rows Loaded event will no longer start an infinite loop

2.0.1

- Fixed an issue with post-load visibility changes in Box Layout

Known Issues

There are no known issues with SPARK Portal Builder Toolkit at this time. For more information on SPARK Portal Builder Toolkit visit: <http://support.salientprocess.com>.

Feedback

Please send an email to support@salientprocess.com, in order to submit bugs and suggestions for the SPARK Portal Builder Toolkit that Salient Process will consider for future releases.
